

Sleeve wrap packaging machine

«VMS-1214 FW»

Typical installations:

for large products (e.g. plain sheets of glass, wooden boards)

Packaging line consisting of

- film sleeve wrapper for film widths up to 1.400 mm (larger sizes on request)
- film changing system for two film widths
- heavy duty shrinking tunnel
- roller conveyor extension

Key benefits of a film changing system:

- ✓ fast format changes: film width can be varied within 30 seconds
- ✓ double film capacity allows double production time without machine's downtime
- ✓ high manufacturing flexibility for small production lots

Technical dates:

VMS - 1214 FW

Length in-feed conveyor:	approx. 3.000 mm
Length indexing conveyor:	approx. 3.000 mm
Film width:	max. approx. 1.400 mm
Passage in height:	approx. 200 mm
Heating capacity:	approx. 36 kW
Electric power:	400 V, 50 Hz
